Professional Experience: 2.3 years

Organisation: Truckola Technologies Pvt. Ltd. (Present)

Designation: Full Stack Developer

Company Profile: Truckola is a young tech-logistics start-up. They are heavily tech-focused company providing inter-state cargo transportation services to manufacturing companies across the country.

Projects:

1. **Elevate (Web Application) :**
Domain: Transportation
Technologies Used: Ruby on Rails, Angular 4
2. **Elevate (Mobile Application) :**
Domain: Transportation
Technologies Used: React Native

Manufacturing companies always want to make deliveries of their cargos at some point and for that they are looking for some genuine vehicle owners who can do the same for them. We (i.e Truckola Technologies Pvt. Ltd) come in a picture over here, we provide a list of vehicle owners which we verified from our side for our clients i.e for Manufacturers. We made this “**Elevate**” platform available for them so that they can select the origin, destination and required vehicle type to place their order. A legal contract is built between us and further we take care of everything in this order (trips) from loading to unloading point including all documentation.

3. **Operation Team Dashboard (Web Application) :**
Domain: Transportation
Technologies Used: Ruby on Rails

This is a platform used by operational team members to manage cargo owners and vehicle owners. This application we have created for our internal staff who can view and manage our both parties (i.e our cargo owners and vehicle owners), their trips and update them accordingly.

Organisation: Codevilla Technologies Pvt. Ltd (9 months)

Designation: Full Stack Developer

Projects:

Restomulti (Web Application) :

Domain: Hospitality

Technologies Used: Yii Framework

Restomulti is a restaurant food ordering and restaurant membership system.
